

Flip (formerly Flipgrid) is a video-based social learning platform that helps educators engage and assess their students. It can be used to create and

share short video clips, as well as to view and respond to videos created by others. The FREE platform is available via a web browser or through a mobile app on iOS and Android devices.

The process is pretty straightforward to get set up and start using Flip.

## Benefits of Flip

**~Allows students to have a voice:** Flip provides a platform for students to share their thoughts and ideas in a safe and secure environment. This can be particularly beneficial for shy or introverted students who may not feel comfortable speaking up in class.

**~Encourages collaboration:** Flip can be used to encourage students to work together to solve problems or complete tasks. This can help to promote teamwork and collaboration skills.

**~Enhance learning:** Flip can be used to supplement and enhance traditional classroom learning.

For example, students can use Flip to record and share video responses to questions or prompts from their teacher. This can help to deepen understanding and engagement with the material.
